SUBJECT INDEX

Abrasion resistance and its measurement 483
Absorption spectra, infrared, and oxidation process of sodium-butadiene rubber 591
Activation, mechanical, of rubbers 250
Aggregation, molecular, in amorphous polymers 763
Aging
Oxygen-absorption test 981
studies and rubber oxidation 989
Alfin catalysts and the polymerization of butadiene 35
Alkoxy radicals in isoprenic olefins and rubber 777
Amorphous polymers,
cross-linked, swelling of 290
molecular aggregation in 763
Anisotropy in vulcanizates 557
Antioxidant actions, rubber oxidation and ... 981
Application
of infrared absorption spectra to the investigation of the oxidation process of sodium-butadiene rubber 591
of rubber in the quantitative determination of ozone 750
of *x*-ray diffraction methods to the identification of natural and synthetic rubbers 355

Birefringence of rubbers 182
Blooming, wax, and exposure cracking 1017
Bonded units, study of 664
Bromination products of natural rubber 99
Butadiene
polymer, formation of 916
polymerization of 35
-styrene ebonites, plastic yield of 381
resinous polymers 697
Butyl
rubbers and certain branched olefins 384
vulcanizates, swelling of 894

Carbon
black, interaction between polymer and ... 597
free, in cured rubber stocks 224
Catalysts, alfin 35
Change in the relaxation properties of vulcanized rubber on swelling 140
Chemical
constitution of chlorinated rubber 662
structure responsible for the deactivating effect of compounds which protect rubber from deterioration by oxygen 638
Chlorinated derivatives of rubber 184
Chlorinated rubber
chemical constitution of 662
preparation and properties of 414
solutions, physical properties of 447
Chlorination of natural rubber.
I. Preparation and properties of chlorinated rubber 414
II. Preparation and properties of rubber dichloride 425
Chlorination of natural and synthetic polyisoprenes 970
Comment on the relationship between Gough-Joule coefficients and moduli of vulcanized rubbers 354
Compounding extracted rubber 254
Copper in rubber latex, determination of 472
Cracking, exposure, and wax blooming 1017
Creep, primary, and stiffness of vulcanized rubbers 621
Cross-linking, carbon-carbon, by tertiary alkoxy radicals 777
Crystal violet as an electronic model substance for rubber and related olefins 169
Crystallization
degree of 845
and second-order transitions in Silicone rubbers 366
In unstretched rubber. Microscopic study in polarized light 550

Page

of unvulcanized rubber 54
of vulcanized rubber on stretching, x-ray investigation of 541
Cyclization
of Hevea latex, kinetics of 924
statistical kinetics of Hevea rubber 940
Cyclized rubber
preparation from natural rubber latex 195
structure of 957

Deactivating effect of compounds which protect rubber from deterioration by oxygen 638
Decomposition, peroxide, relation to rubber degradation 857
Deformation,
high elastic 99
of unloaded rubbers 810
Degradation, rubber, relation of peroxide decomposition to 857
Derivatives, partially chlorinated, of rubber. 184
Destructive solution of vulcanized synthetic rubbers 616
Deterioration by oxygen 638
Determination
of copper in rubber latex 472
of free carbon in cured rubber stocks 224
of intrinsic low stress properties of rubber compounds 820
of refractive indexes of elastomers at temperatures from 20° to − 120° C. 585
of structure of rubber by the method of infrared spectroscopy 756
of unsaturation of Butyl rubbers and certain branched olefins 384
Dichloride, rubber, preparation and properties of 425
Dielectric relaxation of natural rubber vulcanizates 320
Direct reinforcement of natural rubber latex mixes 649
Dissolution, destructive, of vulcanized synthetic rubbers 616
heats of, of synthetic high-molecular compounds 773
Distillation of tetramethylthiuram disulfide .. 266
Disubstitutive carbon-carbon cross-linking by tertiary alkoxy radicals in isoprenic olefins and rubber 777
Dynamic
mechanical measurements of styrene-butadiene copolymers 574
properties of raw and vulcanized polymers. 831
shear properties of rubberlike polymers ... 507
study of reinforcement 787

Effect
of chemical changes in the rubber hydrocarbon on its oxidizability 229
of fillers on plasticity of unvulcanized rubber 232
of sulfur on the oxidation of sodium-butadiene rubber 853
Elastic
modulus and swelling of Butyl vulcanizates. Influence of fillers 894
tension, temperature coefficient of 845
Electronic model for rubber, crystal violet as 169
Equation of state of rubber from the viewpoint of thermodynamics 132
Equivalent effects of time and temperature in the shear creep and recovery of elastomers 83
Exposure cracking and wax blooming 1017
Extracted rubber,
compounding of 254
vulcanization of 254, 266, 269, 275
Extrusion and rheometric tests 520

Failures of rubber insulation caused by soil microorganisms 399
Fillers
effect on plasticity of unvulcanized rubber. 232
influence of 878

Page

Formation of spongy butadiene polymer 916
Friction, coefficient of, of vulcanized rubber .. 374

Gough-Joule coefficients of vulcanized rubber 354

Heats of dissolution and swelling of some synthetic high-molecular compounds 773
High elastic deformation 99, 326, 344
Hydrocarbon rubber, oxidizability of 229

Identification of natural and synthetic rubbers by x-ray diffraction 355
Impact resilience as a function of temperature 199
Influence of structure of elastomers on their permeability to gases 109
Infrared
absorption spectra and oxidation process of sodium process of sodium-butadiene rubber 591
spectroscopy in determination of structure of rubber 756
Insulation, rubber, failures caused by soil microorganisms 399
Interaction between carbon black and polymer in cured elastomers 597
Intermolecular forces, role of, in high elastic deformation 99, 326, 344
Ion exchangers, polar rubbers as 197
Isoprene-styrene ebonites, plastic yield of ... 381
Isoprenic olefins and rubber 777

Kinetic analysis of organic halides. II. Analysis of macromolecules built up of monohalide units 436
Kinetics of cyclization of Hevea latex 924
of high elastic deformation 326
statistical of Hevea rubber cyclization 940

Latex
compounded, stability of 462
determination of copper in 472
Hevea
kinetics of cyclization 924
rubber hydrocarbon in 737
mixes, direct reinforcement of 649
natural rubber, preparation of cyclized rubber from 195
Light stiffening of rubber 1
Low molecular products and mechanism of zinc oxide activation 275
Low temperatures, retraction test for elastomers at 684

Macromolecules, analysis of, built up of monohalide units 436
Mechanical
activation of rubbers (oxidation under mechanical stress) 250
measurements of styrene-butadiene copolymers 374
Mechanism of the action of aromatic thiols on rubber solutions 161
Melting of unvulcanized rubber 64
Microscopic study in polarized light 550
Moduli of vulcanized rubbers 354
Modulus, elastic, of Butyl vulcanizates 878
Molecular
aggregation in amorphous polymers 763
mechanism of high elastic deformation 326
structure of styrene-butadiene copolymers. Dynamic mechanical measurements 574
weight, rapid determination of average, in Hevea latex 457
Monohalide units, macromolecules built up of 536

Noncrystallizing rubber 328

Olefinic systems, radical mechanisms in 777
Olefins
related to rubber, crystal violet as electronic model for 169
unsaturation of branched, and Butyl rubbers 384

Transformation of thiols compounded in raw rubber	914
Ultraspeed tensile of rubber and synthetic elastomers	144
Unstretched rubber, crystallization in	550
Volume changes in the stretching of vulcanized natural rubber	767
Volumetric oxygen-absorption test for rubber aging	981
Vulcanizates, anisotropy in	557
Vulcanization	
of extracted rubber	262, 266, 269, 275
influence of degree of, on deformation	810
and power factor	299
with sulfur, stoichiometry of	878
of synthetic rubbers	569
Vulcanizing agents, organic sulfides as	211
Wax blooming and exposure cracking	1017
x-ray	
diffraction methods, application of, to identification of natural and synthetic rubbers	355
investigation of the crystallization of vulcanized rubber on stretching. II	541
Zinc oxide activation, mechanism of	275
